## MPI 3021/ 3041 Dot series

### Faster and easier application - for anyone

**The MPI 3021/ 3041 Dot series is designed to make professional installation results possible for almost any end user. A special dotted adhesive ensures simple and fast application - these films are even easier to use than conventional air egress materials. It means that non-specialist staff can install displays in retail environments, public spaces and exhibitions without professional help or tools.**

Offering excellent printability on all print platforms along with good transparency (MPI 3041) and a white matt version (MPI 3021), mean that arresting designs can be created with strong visual impact. Removal at end of life is also straightforward - with simple peeling off by hand.

**FEATURES**

- Fast and easy application
- Easily removable after its lifespan has been reached
- Excellent printability across all main digital printing platforms
- Good adhesion on glass or smooth surfaces
- No water or application tools needed

**BENEFITS**

- Cost savings on installation (suitable for non-specialist staff)
- Excellent aesthetics and high visual impact
- Easy to remove
- Printable on all print platforms
